London 4th of May 2017

Dear sir or madam,

Oğulcan Tayman and I worked on several personal projects and we are often discussing rigging methods and sharing advices about our works.

I can confirm that Oğulcan is a very talented and hardworking rigging artist, always trying to improve himself and perfect his knowledges. He is learning very fast and his work speed and capability to resolve problems are remarkable. He is also interested by the different steps of the creation of an animated movie, as modelling, lighting, rendering which allows him to have a global vision of the project and work more efficiently with artists from other departments.

Working with Oğulcan, I can say he always had an extreme intention for details: studying anatomy and references movement videos to make sure the deformations are naturals. But his main goal is to make his work the most efficient possible for the animators, with friendly Shape controls and a low framerate

I really enjoy working with him, as he is very friendly, helpful and his catching motivation has no limit.

Therefore, I highly recommend Oğulcan Tayman as character TD / rigging artist.

Please feel free to contact me at laura.trouche@gmail.com if you would like to discuss his qualifications. I'd be happy to expand on my recommendation.

A handwritten signature in black ink, appearing to read 'Laura Trouche', with a stylized, sweeping flourish extending from the end.
